

Investment Objective

Our Emerging Market Debt Stars Fund invests in a concentrated portfolio of hard currency corporate, emerging market debt.

We believe that a concentrated portfolio following our principles of quality and value is the best way to deliver income, upside opportunity and downside protection.

This means that we invest in key businesses in their respective industries and geographies, with strong underlying fundamentals, able to navigate through cycles. We favour companies with strong business models, financial strength & predictable cash flows.

Investment objective to generate a total return of 5-6%, net of fees, from income and capital growth over the medium term with low volatility and exposure to macro-economic risks with a standard deviation of 4-6%.

Performance, USD

Performance Analysis

	Since Inception					
	Jul-23	3M	2023 YTD	1 Yr	Cumulative	Annualised
Portfolio	+2.1	+2.1	+3.2	+7.5	+4.8	+1.5
JPM CEMBI BD	+1.0	+1.7	+4.7	+5.2	-0.6	-0.2

Performance since launch on 17th February 2023 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s Emerging Market Debt USD Strategy, which the Fund follows, based on total return (with coupons reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Benchmark: JPM CEMBI Broad Diversified. Source: SS&C Technologies, Bloomberg.

Portfolio Comment

The fund was up 2.1% for the month. Risk sentiment improved on strong economic data and inflation moderated further. This led to additional tightening in emerging market credit spreads, particularly in the high yield sector which now trade inside the last 20-year average.

There was positive underlying corporate news too. Liquid Telecom (South Africa, communications) proactively discussed refinancing options for its bonds well ahead of schedule. Plans included reducing capex to improve cashflow, monetising assets and a potential capital injection from main shareholders.

Kosmos and *Tullow Oil* (Ghana, energy) announced new assets coming online which will materially increase production. Capex will subsequently decline at both companies and aid free cashflow generation going forward. *Kosmos* also had its credit rating upgraded on the back of the recent sovereign upgrade.

Kernel (Ukraine, agro-commodity) was weaker given ongoing military conflict in the country. There was destruction of infrastructure in the Chornomorsk port following suspension of the Black Sea grain deal, causing disruption to exports from the area.

The market is increasingly focussed on the resilience of economic growth. Probabilities are shifting from recession to a “soft landing”. This should be supportive of the asset class and corporate credit fundamentals continue to be robust.
