

Investment Objective

Our Emerging Market Debt Stars Fund invests in a concentrated portfolio of hard currency corporate, emerging market bonds.

The objective is to generate attractive total returns primarily from income yield and targets low volatility by managing duration.

We believe that an unconstrained concentrated portfolio following our principles of quality and value is the best way to deliver income, upside opportunity and downside protection.

This means that we invest in key businesses in their respective industries and geographies, with strong underlying fundamentals, able to navigate through cycles. We favour companies in structurally attractive industries with strong business models, financial strength, predictable cash flows & management teams with proven track records.

Average Bond Price	93.5

Portfolio Comment

The fund was up 1.1% for the month. Risk sentiment remained constructive on robust economic data and the Fed again signalling likely interest rate cuts. This supported credit spread compression.

There was positive underlying corporate news too. Total Play (Mexico; Communications) addressed near term refinance risk by announcing an exchange offer for their remaining unsecured 2025 bonds. The exchange is on a par-for-par basis for new 2028 secured bonds, paying a 10.5% coupon.

Tullow Oil (Ghana, Energy) reported solid results. Importantly, 2024 guidance is for a sharp decrease in capital expenditure which will improve the free cashflow profile. Management also committed to further deleveraging.

IHS (Nigeria, Industrial) results highlighted positive developments on contract renewals with key customers and balance sheet optimisation. Macro pressures appeared to be easing in Nigeria too.

The main detractor was Wom (Chile; Communications). Management said debt refinancing had been delayed amid ongoing negotiations with banks. The company's credit rating was subsequently downgraded.

Ahead, standalone corporate credit fundamentals look stable overall. The macro narrative around economic growth/inflation and Fed interest rate cuts will continue to be the main driver for credit spreads. A soft landing looks increasing likely which would be supportive of the asset class and a good time to lock in attractive yields.

Performance since launch on 17th February 2023 is that of the Fund's A1 USD Share class. Prior to launch performance was that of J. Stern & Co.'s Emerging Market Debt USD Strategy, which the Fund follows, based on total return (with coupons reinvested) and net of 1% fees per annum, deducted quarterly in arrears. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. Comparator: iShares JPM EM Corporate Bond ETF, with distributions reinvested, CEMB US, CUSIP 464286251. Source: WIZE, Bloomberg.
