

Investment Objective

The World Stars Global Equity Fund seeks to achieve its objective by investing in a concentrated selection of shares in leading global companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term horizon. We do not follow benchmarks and always seek to invest in quality and value.

Quality means companies that are global leaders, have strong competitive positions and pricing power in structurally attractive and growing markets, have management teams with strong records of value creation and have robust balance sheets.

Value means buying those companies at prices that allow for the prospect of significant capital growth over 5-10 years or more.

Performance since launch on 14th June 2021 is that of the Fund's A1 CHF Share class. Prior to launch performance was that of J. Stern & Co.'s World Stars CHF Strategy, a model or hypothetical portfolio, unhedged, which the Fund follows, based on total return (with dividends reinvested) and net of 1% fees per annum, deducted quarterly in arrears, inception 1st October 2012. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI World Net Total Return Index reflects large and mid-cap issuers across 23 developed markets countries and is the benchmark for the Fund. The total return index includes price performance and income after tax from regular cash distributions. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 31st October 2025.

Portfolio Comment

Our World Stars Global Equity fund rose strongly led by robust Q3 results across our companies. Of the 23 which have now reported for Q3, 19 have maintained or raised their full year earnings guidance with a small reduction from the other four. Performance was led by our digital stocks which accounted for five of the top ten performers.

There was limited change in the macro background. In the US core CPI rose slightly to 3.0% even with the impact of tariffs. The US Fed cut rates by 25bps to 3.75% following 25bps in September, driven primarily by the labour market, and the US Government continued to work on refining the new tariff arrangements, including with China.

Our portfolio has a significant exposure to AI, both to the enablers of the AI revolution such as *Nvidia* (+8%) and *Amphenol* (+13%), and to companies which are generating substantial incremental and high margin revenues from the injection of AI. This group includes *Alphabet* (+16%) which is delivering faster growth across Search, YouTube and Google Cloud from AI. Its Gemini AI app now has 650m monthly active users vs. 350m in March 2025. Similarly, *Amazon's* (+11%) revenue growth has accelerated across ecommerce, digital advertising and cloud services (AWS) from the injection of AI.

LV/MH's (+18%) Q3 revenues improved, particularly in Fashion & Leather Goods, with signs of a recovery in demand for luxury goods and with a significant boost from 'self-help' initiatives.
