WHAT IS THIS PRODUCT?

Type

This is an investment Fund established as a Company With Variable Capital (SICAV).

Objectives

Investment objective The objective of the Sub-Fund is to achieve a positive total return over the medium term by investing in corporate bonds and debt instruments where the country of risk is an emerging market.

Investment policies The Sub-Fund seeks to achieve the Investment Objective by investing in a basket of approximately forty to sixty companies that issue investment grade and high yield emerging market corporate bonds and debt instruments.

The Investment Manager selects such bonds and debt instruments based upon its own fundamental research, always looking for quality issuers. Quality issuers exhibit all or some of the following features: strong and sustainable competitive position; in a good and growing industry; visible and predictable cashflows; the financial strength to weather adversity; access to multiple sources of capital; strong management with a proven track record.

The Investment Manager envisages that the bonds or debt instruments will be denominated primarily in US Dollars, although they may also be denominated in other major currencies, such as the Euro or Pounds Sterling. The Investment Manager does not intend to invest in bonds or debt investments denominated in local emerging market currencies.

The remaining assets will be held in cash, cash equivalent investments and in government and investment grade corporate bonds.

The Sub-Fund may hold up to 20% of its net assets in ancillary liquid assets.

The Sub-Fund will use derivative instruments only for the purpose of hedging currencies at asset or share class level.

The Investment Manager integrates sustainability risks into its investment decisions.

The Investment Manager seeks to promote environmental and social characteristics within the meaning of Article 8 SFDR.

Benchmark uses The sub-fund is managed actively with no reference to any benchmark.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy This Share Class does not pay dividends. Any income which may result from the Fund's investments, will be reinvested into the Fund.

Launch date The Sub-Fund was launched on 17/02/2023. This share class was launched on 30/07/2024.

Sub-Fund Currency The reference currency of the Sub-Fund is USD and the currency of the share class is EUR.

Switching Shareholders have the right to switch all or part of their Shares in any sub-fund or Class of a sub-fund into Shares of another existing sub-fund or Class according to the limits set out in the prospectus.

Asset Segregation The assets and the liabilities of each Sub-Fund are segregated by law.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a low level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPS manufacturer, Waystone Management Company (Lux) S.A., is not entitled to terminate the product unilaterally.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund performance. Please refer to the Fund prospectus, available free of charge at <https://funds.waystone.com/public>.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 October 2017 and 31 October 2022.

Moderate: this type of scenario occurred for an investment between 31 March 2017 and 31 March 2022.

Favourable: this type of scenario occurred for an investment between 31 January 2016 and 31 January 2021.

WHAT HAPPENS IF WAYSTONE MANAGEMENT COMPANY (LUX) S.A. IS UNABLE TO PAY OUT?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total Costs	150 EUR	824 EUR
Annual cost impact*	1.5%	1.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.6% before costs and 3.0% after costs.
