

Investment Objective

The US Stars Equity fund seeks to generate long term capital growth by investing in a concentrated portfolio of American companies with enduring competitive advantages and a long runway of growth.

We select companies based on our own fundamental research, taking a long-term investment horizon. We do not follow benchmarks and always invest in quality.

Quality for a company means strong competitive positions, operating in good and growing industries, the financial strength to weather adversity and strong management teams with track records of value creation.

We seek to identify undervalued quality growth companies where the scale or persistence of growth is underappreciated by the market and there is the prospect of significant capital growth.

Performance since launch on 30th Sept 2024 is that of the Fund's A1 USD Share class. Prior to launch Performance is that of J. Stern & Co.'s US Stars Strategy, a simulated or hypothetical portfolio, that has been a standalone strategy since 1st June 2023, unhedged, which the Fund follows. Since 1st October 2012 performance is total return (with dividends reinvested) and net of 1% fees per annum, deducted 0.25% quarterly in arrears. Prior to 1st June 2023 (and from inception on 1st Oct 2012) performance is that of the US primary listed holdings of the World Stars Global Equity Strategy (and so without any allocation to cash), with performance reduced by 0.25% quarterly in arrears to represent 1% fees per annum. Past performance is not a reliable indicator of future results; the value of any investment can fall as well as rise; and returns may increase or decrease as a result of currency fluctuations. The MSCI USA NTR is designed to measure the performance of the large and mid-cap segments of the US market. With 593 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in the US. Source: Factset, Wize, Bloomberg, J. Stern & Co. As at 31st January 2026.

Portfolio Comment

The US Stars portfolio returned +2.4% in January, an encouraging start to the year and ahead of the broader market, which returned +1.3%.

Markets began the year positively despite ongoing political uncertainty. Investor sentiment was supported by constructive news flow, particularly within the technology sector, which helped buoy equity markets.

Lam Research (+36.4%) was among the strongest performers during the month. The need to expand manufacturing capacity remains compelling, underpinned by robust underlying demand for semiconductors. Lam Research is particularly well positioned to benefit from increased investment by memory manufacturers, as its deposition and etch tools are critical to the production process.

Home Depot (+8.9%) and Lowe's (+11.2%) also performed well over the month, as the home improvement sector rallied on expectations of interest rate cuts.

Among the detractors were Salesforce (-19.9%). The software sector continues to underperform amid concerns that advances in artificial intelligence could disrupt their business models. Earnings results from peers this month such as Microsoft and Service reinforced this negative sentiment. We believe, however, that companies with strong proprietary data and deep customer relationships, such as Salesforce, are well placed to leverage AI to enhance and strengthen their offerings.

Portfolio activity during the month was limited. We modestly reduced our position in Lam Research following its strong share price performance and reallocated capital to Meta, Amazon, and Nvidia.

We remain confident that our portfolio of high-quality companies with strong structural growth characteristics is well positioned to deliver attractive long-term returns for investors.
